

DELMON INDUSTRIAL COATING (PTFE)

Delmon Industrial Coating is specialised in the Ceramic Fluoropolymer Coating for Metallic spare parts including, Stud Bolts, Nuts, Gaskets, Washers, and other metallic parts.

This specialised Polytetrafluoroethylene (PTFE) offers a wide range of superior advantages compared to variety of other coating products in the Oil & Gas industry.

The added value Delmon Industrial Coating services provides to the Metallic products include:

- Anti-Corrosion properties against severe Environmental conditions.
- Low coefficient of friction.
- High Chemical resistance against various reactive chemicals.
- High operating temperature reaching up + 260C
- Anti-freezing temperature reaching up to - 260C
- Non-stick yet durable and superior properties.
